How To Order Or Register For School Meals...

Ordering your child's daily lunchtime with HCL is done online through SchoolGrid (https://app.schoolgrid.co.uk).

SchoolGrid is an easy-to-use ordering and payment system, whereby parents and children can view their lunch menus, including the nutritional information of each meal and order their preferred meals.

Pre-ordering your child's lunch can be done online at home and if your child has an allergy, the dishes unsuitable may be blocked from view. You can easily order your child's lunchtime meal for a day, week, month, or a whole term.

When your child collects their lunch at school, they will select their name on a **touch screen** during lunchtime service and their meal choice and dietary needs (if any) will be displayed.

If your child is not entitled to free school meals, you can pay for their meals by **card payment** if your school supports it.

How to get started

To get set up, give your email address to your school's office and they will provide you with a SchoolGrid account. You'll receive an email from SchoolGrid with instructions on how to log in and get started.

If your child has an allergy or special dietary requirements, please visit the **Allergy Management System** section of the HCL website **www.hcl.co.uk/allergy-overview** or speak with your school's office for further guidance.
